INKJET PRINTER TEST & MAINTENANCE SHEET

Print on plain A4 paper at Actual size / 100%. Use normal print quality.

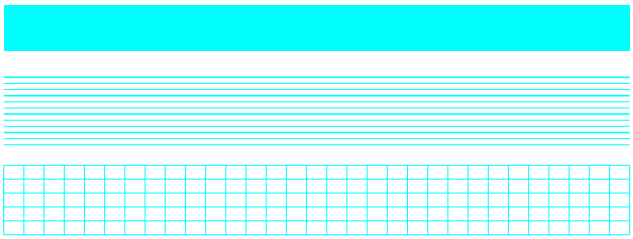

1 INDIVIDUAL INK COLOURS

Look for white streaks, uneven fill, missing lines or missing colours.

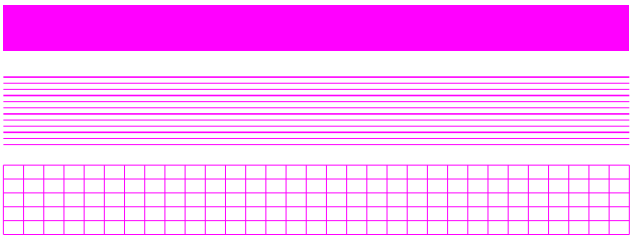

BLACK

CYAN

MAGENTA

YELLOW

2 GREYSCALE & COLOUR MIX

Each shade should be distinct. Mixed colours should look even.

3 ALIGNMENT & FINE DETAIL

Inspect the lines and dots for breaks, doubling or fuzzy edges.

WHAT TO CHECK

Missing colour or white gaps? Run the printer manufacturer's nozzle-check utility.

Broken lines or streaks? Follow the maker's cleaning guidance, then test again.

Avoid repeated cleaning cycles: they use ink and may not fix a blocked printhead.

This is a general print-quality test, not a replacement for a printer-specific nozzle check.
